

M1

LIVE PERFORMANCE DYNAMIC MICROPHONE

The M1 is a rock-solid dynamic microphone that is designed for the ultimate in performance for live vocals. Featuring a high-power neodymium capsule, it delivers a warm, detailed response with incredible clarity.

Its tightly controlled cardioid polar pattern minimises spill and feedback, and its precision-engineered internal design almost completely eliminates handling noise. Backed by a lifetime warranty, the M1 is renowned as an industry-standard live vocal microphone that is built to withstand the rigours of the stage and the road, night after night.

- Live performance dynamic microphone for vocals
